

Web sites

ABMP School Issues Forum, Denver 2005

Technology in the Classroom

Presenter: Lorena Haynes

The following is a compilation of the educational web sites that were discussed at the meeting, and some others that due to the lack of time were not mentioned. They are listed in two categories, "For the Student" and "For the Educator".

For the technologically challenged, this should reach you with part of the text in blue. If you press Ctrl button and click on the blue part, your computer should automatically go to that site. This is called a hot link.

**For the Student:**

[www.studystack.com](http://www.studystack.com)

This site is a favorite of my students, as it takes material that you can input and manipulates it into study games. This is the site that flash cards can be downloaded onto PDA's and some cellphones.

[http://www.training.seer.cancer.gov/module\\_anatomy/anatomy\\_physiology\\_home.html](http://www.training.seer.cancer.gov/module_anatomy/anatomy_physiology_home.html)

Here you will find a simple modular learning tool for A&P. It comes from a government site that explains about cancer. It includes quizzes and drag and drop activities. This is not comprehensive material, but of good use.

<http://www.nlm.nih.gov/medlineplus/mplusdictionary.html>

Medical Dictionary that is a service of the National Library of Medicine and the National Institute of Health

[http://www.thebodyworker.com/test\\_message\\_1.htm](http://www.thebodyworker.com/test_message_1.htm)

Test questions online

<http://www.essentialolutions.com/SampleMassageExam.html>

Sample massage test questions

<http://connection.lww.com/products/ashton/quizbank/QBAshton.html>

Great practice test from Lippincott

<http://www.webmd.com/>

Web MD is a very user friendly site for insight into pathologies and medications in general.

<http://medtropolis.com/>

Home of the Virtual Body, interesting way to look at A&P

**For the Educator:**

Attendance

<http://www.countmeinllc.com/timeclock/OnlineVideos/index.html>

This site shows the nuts and bolts of using the “Count Me In” software in a video demonstration. If you have the CD, you have this material.

Teaching today-

<http://www.glencoe.com/ps/teachingtoday/weeklytips.phtml/18>

Great tips about ways to effectively teach adults.

Evolve

[http://evolve.elsevier.com/staticPages/i\\_index.html](http://evolve.elsevier.com/staticPages/i_index.html)

This is the Web site that goes with *Mosby's Essential's of Science and Fundamentals of Therapeutic Massage*. This is the portal for the online features of the books.

Lippincott Williams & Wilkins

[http://connection.lww.com/SubChannels/02103\\_partnersineducation/Index.htm](http://connection.lww.com/SubChannels/02103_partnersineducation/Index.htm)

Partners in Education- from Lippincott, this is a resource for educators. Check it out; you may already qualify to use this tool.

<http://connection.lww.com/products/custompublishing/custompublishing.asp#>

It is now possible to customize a book to your program, look at this! I don't know if it is available for massage yet but I'll bet if enough people want to do this they will find a way.

\*note there are hundreds of thousands of free things on the web that can help you. Search for lesson plans on A&P classes, sometimes middle school has some really fun ways of learning the same material like games and animation that really helps the struggling learner.

Also for those that need a little help in the technology area, I would suggest finding lesson plans on “searching the web” or tutorials on “using search engines”.

I would like to say that I am amazed at the creativity of the individuals in this business. I fully enjoyed the experience and plan on attending as many of these forums as possible. Due to overwhelming demand, my family is starting an educational consultant business. If you would like more information please contact me thru e-mail, as we may be able to help you with curriculum development, technology integration and instructor training.

Thanks,

LH
