

# DIRECTIONS: At My School We.....

**1.**

Think about something you do at your school that makes a difference to students, faculty, your ability to stay inspired and motivated, or to the overall campus culture.

**2.**

Share your ideas with the table by describing a best practice you use at your school and listening to the best practices of other schools.

**3.**

Pick one idea that came up during your discussion to share with the large group.

**4.**

Share your idea if your table is selected by the facilitator during the large group discussion.

## EXAMPLES: At My School We.....

**1.**

At our campus we write up a social calendar for the year. It includes pre-scheduled group study sessions before big exams in each module, movie nights (we show modality videos), a summer barbeque, and a bring your family and friends to student clinic day. The social calendar helps students feel welcome and supported at the campus.

**2.**

We gave our instructors a paid day to develop an instructor website for their classes. The instructor websites give information about class supplies, due dates, and is a place where instructors can post lecture notes for students who miss classes. One instructor has started an anatomy blog and this is a big hit with students.
